

I am proud that over the past 10 years the Bulgarian Association for Drug Information (BADI) has been an important partner to the Bulgarian Drug Agency. The active role in the organization and conduction of educational events, providing expert opinions and the daily work of maintaining the awareness of it's members on drug regulation issues make BADI's role significant.

Over the past 10 years BADI has succeeded in creating a society of experts in the field of drug regulation, which is in constant dialogue about the latest news with leading experts from Bulgaria and abroad. BADI also ensures a platform for sharing experience and professional discussions about potential solutions of the current challenges in the pharmaceutical industry.

In 2010 BADI started as an ambitious academic project, but in the past years the concept has expanded and today the Association welcomes its 10-th anniversary as a significant factor of health policy. The enthusiasm with which the BADI's team develops its educational mission and contributes to the improvement of the medical regulatory environment in Bulgaria is remarkable.

As you celebrate your 10-year anniversary, I have much pleasure in sending my warmest greetings to the Management Board, the team and the members of BADI, together with my best wishes for health and inspiration for continuous professional development.

Bogdan Kirilov, MScPharm
Executive Director
